COUNTER DAY

FEATURING DANFOSS COMPRESSORS

Danfoss Compressors

The Danfoss compressor range goes from small direct current hermetic compressors for mobile applications up to large scroll compressors for commercial air conditioning or industrial applications.

Special versions, such as energy optimized compressors, variable speed compressors and compressors for solar applications are available. The range covers all common HFC, HCFC and CFC refrigerants as well as hydro-carbons for the smaller models.

Danfoss compressors are used in numerous applications such as white goods, mobile refrigeration, light commercial refrigeration, commercial refrigeration and air conditioning.

Date: Tuesday, April 30th 2019 • Time: 7:00am - 12:00pm

Bagels and coffee will be served!
