

Robertshaw®

HEATING CONTROLS TRAINING CLASS

710 Series Gas Heating Valves

All 710 low capacity gas heating valves include a manual valve (gas cock), automatic pilot safety valve, pilot outlet, pilot gas filter and pilot adjusting key. The control can be mounted in any position except upside down.

780 Series Ignition Modules

The 780 Series Hot Surface Ignition Modules are designed for use on gas fired heating systems. The system acts on a demand for heat by a switch or thermostat to supply power to the ignition control.

41-400 Norton Hot Surface Ignitors

41-400 Series Norton Hot Surface Ignitors deliver ignition in heating systems. From furnaces and boilers to rooftop heaters, infrared burners, unit heaters, water heaters and many other types of HVAC equipment.

CLASS DETAILS

Given by Mark Chance from Robertshaw tech support with over 40 years of experience.

Class focus will be: millivolt, direct spark, intermittent pilot, standing pilot and hot surface systems, retrofits and more!
