

VACUUM PUMP CLINIC

Featuring New Products from JB Industries

F6-DP Recovery Unit

features a full 1 horsepower motor and is backed by an unsurpassed 3 year Over The Counter warranty. The F6's dual piston compressor recovers vapor at .6 lbs a minute and offers a self purge feature for changing refrigerants. The new high efficiency micro-channel condenser design keeps tanks cool and discharge pressures at a minimum. Push pull recovery rates soar to 11.00 lbs. a minute depending on hoses and length.

DMG2-5 Digital Manifold

The latest addition to the JB manifold line-up, the 2-Valve DMG2 digital manifold stands out from the competition with a large, easy to read back-lit screen with intuitive buttons that make getting the job done even easier. The DMG2 is stored with over 80 refrigerants, simultaneously calculates superheat and subcool, and features a robust transducer that is as reliable as a traditional manifold. Its ergonomic design features a soft grip protective overmold with slip-proof notched knobs and a convenient hook to hang your manifold in tight spaces. It includes a rugged carrying case and heavy duty clamps. Also includes 60" KOBRA® CCLE Hose Set. 800 psi Working - 4000 psi Burst.
