

TRAINING CLASS

PSC & ECM Made Easy

Instructor: Saul Ortega

Location: Allied Refrigeration, 1256 Price Street, Pomona, CA 91767 - Ph: (909) 623-2675

Date: Wednesday, May 08, 2019 **Time:** 5:00pm to 7:00pm **Dinner and drinks served.**

Evergreen Motor Details

The knowledge gained in this class will help all HVAC professionals gain the confidence and competence needed to discuss the benefits of aftermarket ECM. Evergreen motors are aftermarket ECM capable of replacing PSC or X13 standard ECM in a wide variety of HVAC systems. As a PSC upgrade the Evergreen provides energy savings, and quiet continuous fan operation. As a generic X13 replacement Evergreen provides the repair part when you need it to get the job done. Genteq introduced aftermarket ECM to the HVAC industry in 2007 and continues to be a leader in ECM technology with over 25 years of experience in OEM HVAC systems.

Class Objectives

- Overview HVACR Motor Market
- Determine HP & RPM from non-legible data plate
- Overview ECM Technology & Genteq ECM troubleshooting
- Genteq Evergreen ECM aftermarket motor solutions
- Refrigeration Motors
