Competitor D

*Comparison is based on 5-ton gas/electric model versus other 5-ton gas/electric models.

Available 3-12.5 tons

DID YOU KNOW?

Allied Commercial™ Z-Series™ units are up to 18% lighter than other comparable units with the same footprint - in fact, we offer the lightest 5-ton gas/electric unit on the market today.

When a new commercial rooftop unit is more than 10% heavier than the unit you will be replacing, you may be required to have a structural engineer evaluate the building.

Enjoy savings of up to \$1,200* in structural engineering cost by using Z-Series.

*Savings is an estimate only. Actual savings will vary.
