

## AZURE Azure ECM Motors Training Class

Class Focus: New products and what they replace, as well as motor construction basics - differences between PSC & ECM motors.

**Azure Motors** Thve Mars Azure line of ECM motors are electronically controlled motors that can replace many applications. The motors have two models that can replace almost all PSC and X-13 motors, with ratings ranging from 1/5 HP to 1 HP at 115V or 230V and clockwise or counter-clockwise rotation. The Azure motor has onboard software that auto sizes every application.

## Features:

- Variable speed: The Azure motors are high efficiency variable speed motors.
- No capacitor: The Azure condenser fan motors connect the same as a standard PSC condenser fan motor, but without the capacitor.
- Outboard surge protector: The Azure wiring harness includes an outboard surge protector.
- Start-up learn mode: The Azure runs for about two minutes measuring the external static pressure of the system application, then assigns torque.
- Compatible with all HVAC types: The Mars Azure Digi-Motor 5-1/2 in. ECM 1/2 1 HP High Efficiency Variable Speed Direct Drive Blower Motor is compatible with all HVAC types.

## CONCORD BRANCH

Date: Monday, May 20th • Time: 5:00pm - 7:00pm • Dinner Provided 2170 Commerce Ave. Ste U Concord, CA 94520 • Ph: (925) 825-5711
