A2L TRAINING CLASS

Topic: Solenoid Shut-Off Valves
& Check Shut-Off Valves

A2L Refrigerants are Changing the Rules.

Are Your Shut Off Valves Ready?

What You'll Learn:

This training is designed to provide a comprehensive understanding of EPRs and solenoids, including the key differences between blue-label and yellow-label coils, along with the proper installation, operation, and service practices for each. Participants will learn the do's and don'ts when working with both coil types, as well as field repair techniques for installed LLSVs that can be performed without unsweating and removing the entire valve, when applicable.

The training will also cover best practices for shutoff valve placement within the system.

San Leandro Branch

Wednesday, August 26th, 2026 | 5:00pm - 7:00pm | Dinner Provided

2175 Adams Avenue, San Leandro, CA 94577
